Antibody-dependent cell-mediated cytotoxicity to isolated hepatocytes in chronic active hepatitis, mechanisms responsible for, **385**

Anticholinergics and proximal gastric vagotomy, effect on acid and gastrin responses to sham feeding in duodenal ulcer, **1020**

Antigen deprivation, age and allograft rejection, effect on epithelial cell kinetics in mouse colon, **234**

Antigens, absorption after oral immunisation and induction of specific systemic tolerance, **121**

——, HLA histocompatibility, ABO blood groups and Rh antigens, distribution in alcoholic liver disease, **288**

Antipyrine clearance per unit volume of liver in assessment of hepatic function in chronic liver disease, **596**

Antroduodenal motility, gastric emptying and duodenogastric reflux, simultaneous measurement of, **963**

Antrum and proximal stomach in gastric emptying, **309**

Apolipoprotein A, demonstration in isolated mucosal cells from small intestine and isolated hepatocytes, **219**

Appendicitis, acute, and large bowel malignancy, enkephalins in, **865**

Argon laser photocoagulation in dog stomach, **680**
